For 50 years, Hot Wheels® has pushed the limits of performance and design, creating over 25,000 unique models. Few of these cars earn the distinction of being inducted into the Hot Wheels Garage of Legends™, our elite collection representing the best of the best. Whether they started as a 1:64-scale die-cast car and were later built life-size or were scaled down from production vehicles, this fleet has the originality, creativity, authenticity and blow-your-mind performance capabilities that make you say, "Those are some hot wheels."
